

What is nostr?

Why should you care about nostr?

Nostr

Notes and Other Stuff transmitted by Relay

- Uses cryptographic keys (like bitcoin)
- Standard data formats and APIs
- Censorship resistant
- Decentralized, etc etc...

In other words:

Its a social media platform with **super powers**

What Super powers?

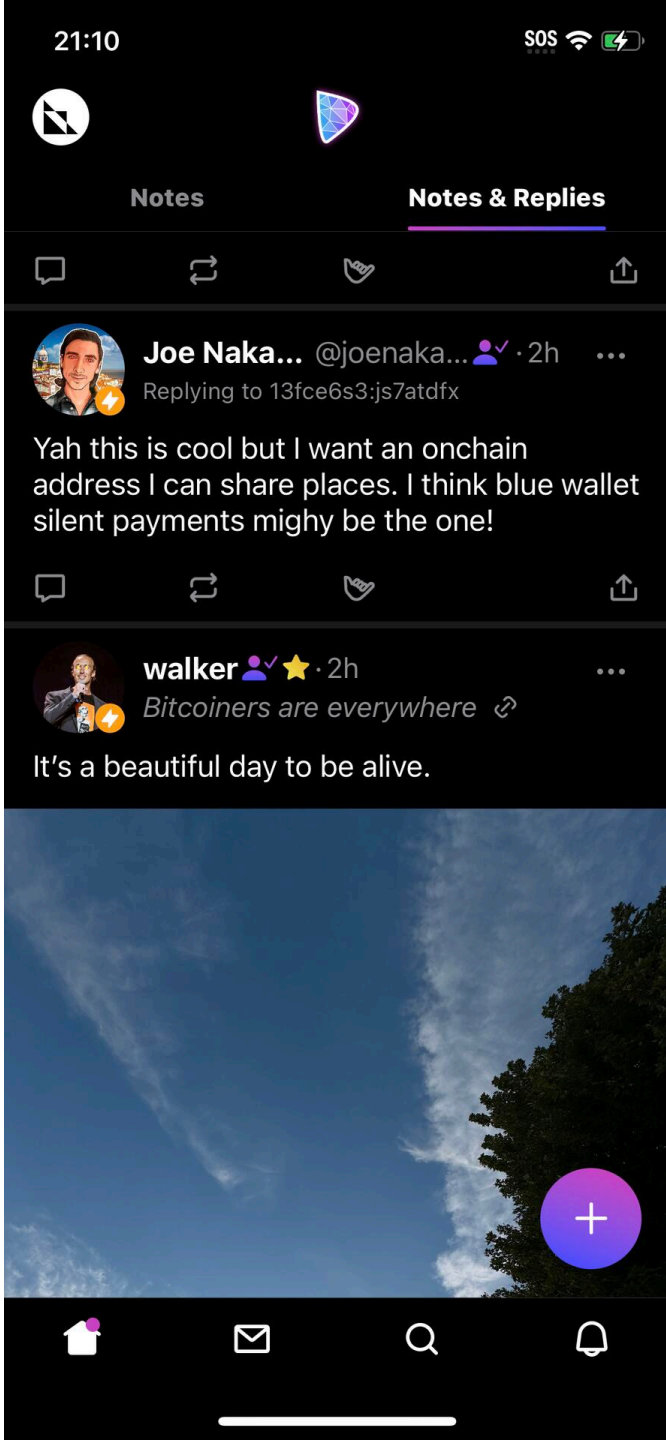

- You own your account, no one can ban you
- 100s of apps, and they all use the same account
- You own your data, every app has your friend list
- Uncensorable, your followers will always see your posts
- Open Source, no company owns it

Okay cool, but where are these apps?

Here is a list of the top social media apps

- Damus damus.io
- Amethyst (Android)
- Primal primal.net

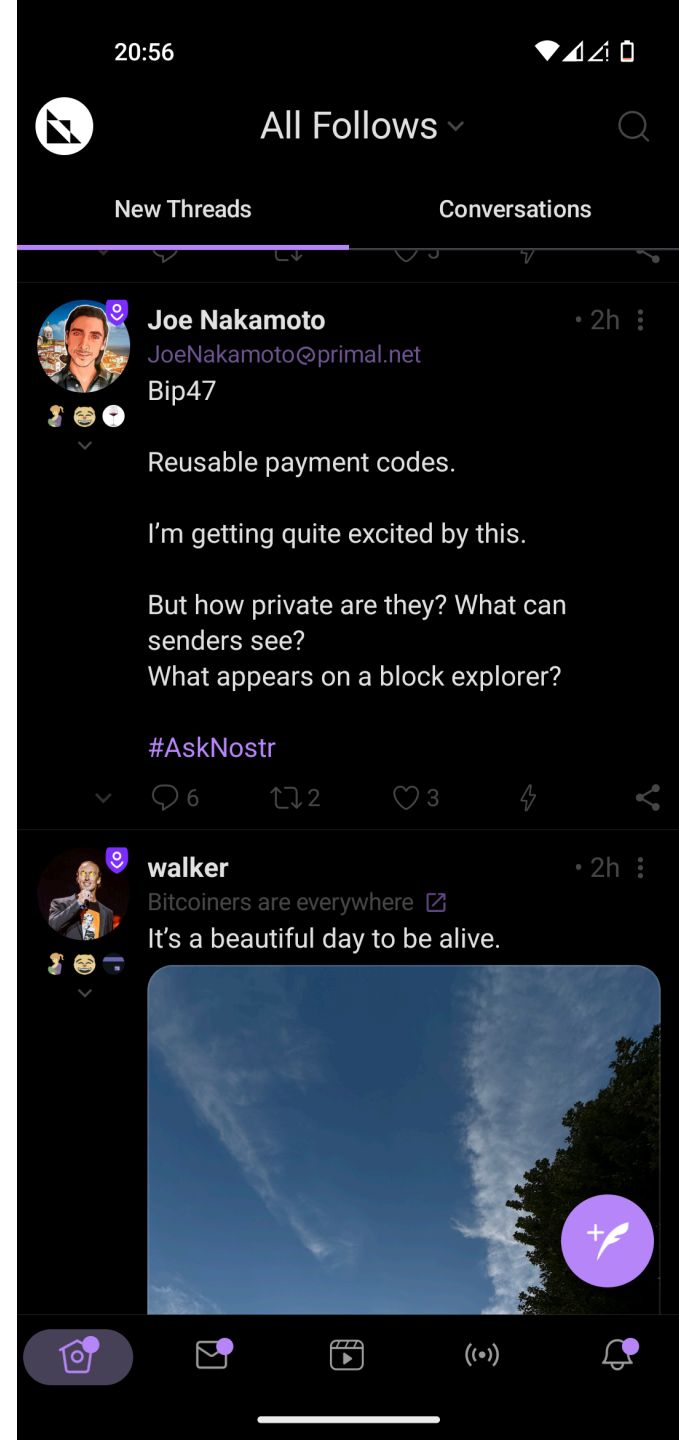

But there are a lot more...

Damus on IOS...

Amethyst on android

Primal on Web, ios, and android

The screenshot displays the Primal web interface. On the left is a dark sidebar with navigation icons and labels: Home, Explore, Messages (76), Bookmarks, Notifications (99+), Downloads, Settings, and Help. A pink 'New Note' button is at the bottom of the sidebar. The main content area features a top header with a search bar, a 'Say something on nostr...' input, and a 'Latest' dropdown. Below this is a feed of notes. The first note is by Joe Nakamoto (@JoeNakamoto@primal.net), posted 1 hour ago, with the text 'Reusable payment codes. I'm getting quite excited by this. But how private are they? What can senders see? What appears on a block explorer?' and a '#AskNostr' tag. The second note is by walker (@walker@primal.net), posted 1 hour ago, with the text 'It's a beautiful day to be alive.' and a large image of a blue sky with clouds. On the right is a 'Trending 24h' section with a search bar and a list of trending notes, including one by Joe Nakamoto about a school visit and another by Will about Bitcoin.

And more social media

The screenshot displays the NOSTR social media interface with four main sections:

- Home:** Shows a post by **godsdeth** reposting a tweet about giving away the first Bitcoin. It includes a text post and a video player showing a video of tomatoes.
- Notification:** Shows a notification from **hazrd149** replying to **@Sacred Peak** with the text: "That's my idea, but I'm mostly looking for inspiration :)". Below it is a video player showing a video of tomatoes.
- My posts:** Shows a post by **dingus(kahn)** replying to **@hazrd149** with the text: "Imagine a paragraph here, explaining why I made this and what I learned from it." Below it is a video player showing a video of tomatoes.
- My reactions:** Shows reactions to the video, including a reaction from **hazrd149** and **Karnage**.

The interface also includes a sidebar with navigation icons (Home, Search, Notifications, Profile, Reactions) and a bottom navigation bar with icons for Home, Search, Notifications, Profile, and Reactions.

Live Streaming

The screenshot displays the Twitch live streaming interface. At the top, there is a navigation bar with a menu icon, a search bar, and language settings (EN). Below this is a category filter bar with options for IRL, Gaming, Music, Talk, and Art. The main content area features a grid of live streams. Each stream includes a thumbnail image, a 'LIVE' badge, the streamer's name, and the number of viewers. The streams shown are: 'Bitcoin Thailand 2024 | Day 2' by Right Shift (3 viewers), 'saturDay's Gone - No Commentary Playthrough' by Slayer (3 viewers), 'Sergio' (5 viewers), 'New stream key, who dis' by NoderunnersRadio (1 viewer), 'NoGood Radio' by NoGood (6 viewers), 'On Victory Road!' by chad (1 viewer), and '[Morning Crypto] [ep #658]' by EddieOz (1 viewer). A 'Popular' section is visible at the bottom of the interface.

And more articles

The screenshot displays the YakiHonne web application interface. On the left is a dark sidebar with the following navigation items: Home, Media, Notes, Smart widgets, Buzz feed, Messages, Notifications, and Change theme. At the bottom of the sidebar is an orange button labeled '+ Post new'. The main content area is titled '19 Articles (In all relays)' and features a search bar with the placeholder text 'Search by npub, nprofile, naddr, nam'. The article feed includes:

Nostr Event Register

This is a register of all of the Nostr event kinds documented in a repository, a note, or on any other publicly-accessible location. Feel free to add your own kinds to the list, but please avoid reserving wide ranges of integers for your event. I have linked each NIP to the wiki topic-overview. Some of them do not yet contain entries, but they will be added soon. Additional, less-established kinds can be observed on the [Tracker page](#).

Amethyst FAQ

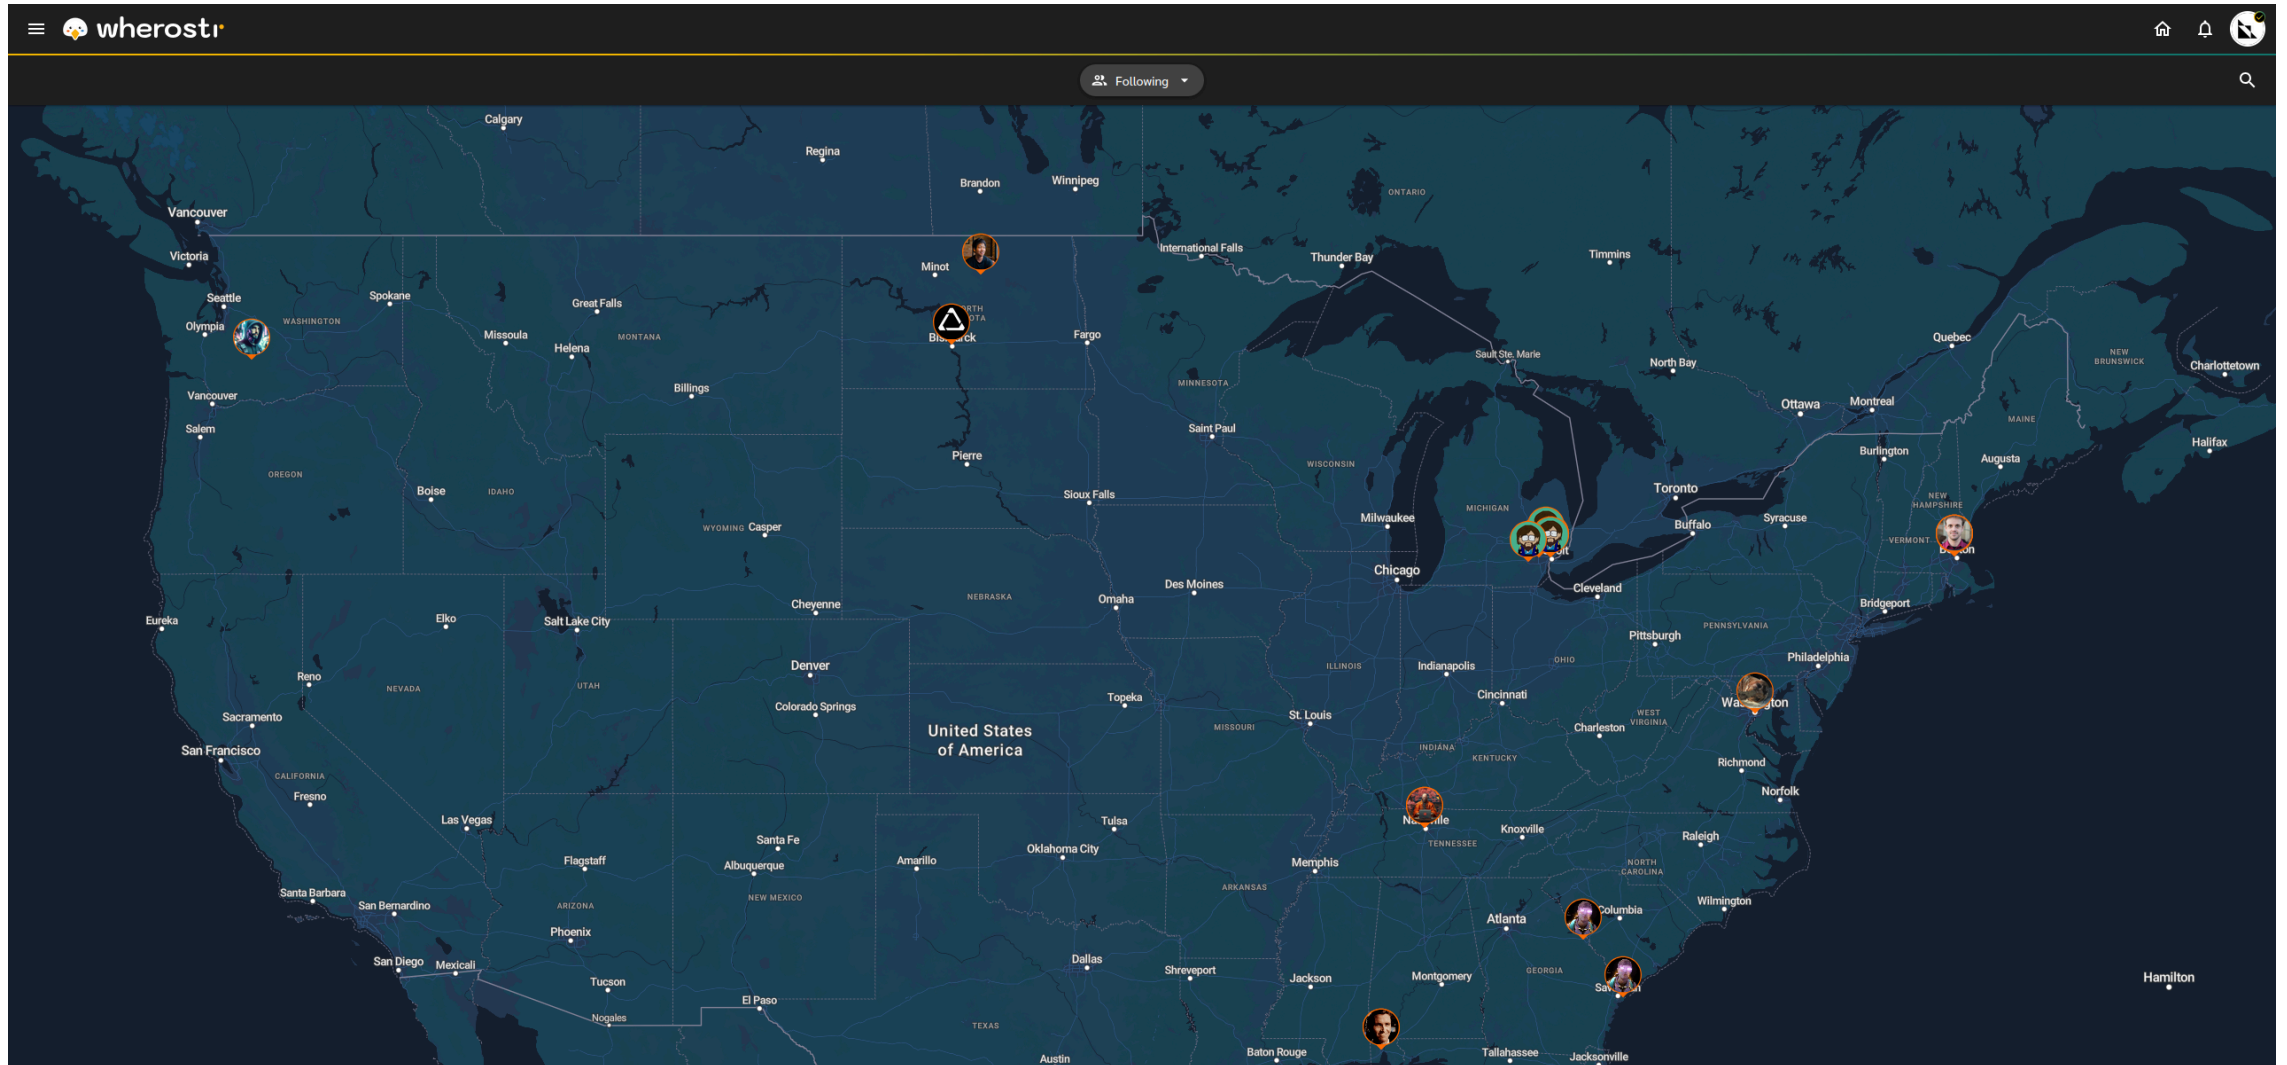

Q: How do I set up my relays?

A: You will need to do a little bit of research for the best experience. No need to feel intimidated. This is a great introduction to how & why nostr works as it does. Amethyst will prompt you to add a relay in places that require a special relay type, such as an inbox relay for receiving direct messages. The default relay settings will work well enough for you to explore the app. Once you're ready to expand your experience, here's a breakdown to help you through the process:

- Public home relays are where notes you publish will be stored. These can be personal, paid, or public. Check relay lists on profiles and use a [relay explorer](<https://nostrrr.com>) to learn more about them.
- Public inbox relays will transmit replies, likes, zaps, etc to you. It is a good idea to set these as public relays and check relay policies to make sure they accept the event types you may expect from your friends or audience. [Nostr.watch](<https://nostr.watch/relays/find>) offers a fairly comprehensive overview of relays' uptime, event

Code Collaboration

The screenshot shows the repository page for 'ngit' on the 'gitworkshop.dev' platform. The page is dark-themed and includes a navigation bar with 'Repos', the repository name 'gitworkshop.dev', and a user profile 'hzrd149'. Below the navigation, there are tabs for 'About', 'Proposals', and 'Issues' (with a count of 11). The main content area is divided into two columns. The left column contains the README for 'ngit', which describes it as a command-line tool for sending and reviewing patches via nostr. It lists features such as seamless integration with gitworkshop.dev, full implementation of the nostr git protocol (nip34), and the ability to manage proposals as branches. The right column contains metadata for the repository, including a 'clone' button, a description, links to git servers (codeberg.org and github.com), website links, and a list of maintainers (DanConwayDev).

README.md

ngit

a command-line tool to send and review patches via nostr

- works seamlessly with gitworkshop.dev
- fully implements nostr git protocol (nip34)
- enables proposals to be managed as branches, similar to GitHub PRs, or patches similar to patches-over-email

see gitworkshop.dev/ngit and gitworkshop.dev/about for more details

git-remote-nostr

a git remote helper (git plugin) included with ngit that enables nostr integration with native git commands when used with a nostr remote eg `nostr://npub123/identifier`

- repository state stored in a nostr event with git server(s) used for data sync
- treats open proposals branches prefixed `pr/*`
